

Product data sheet

IQ lock M DL

Mechanical panic lock for simple panic functions on double leaf doors

Product features

Mechanical self-locking ensures automatic crossbar projection every time the door is closed
Active leaf is unlocked by triggering the passive leaf (full panic function)
Divided cross latch prevents the bolt blocking even under sideload
Small rear backset and small dimensions of the lock case
Can be combined with electronic thumbturn cylinders

Application Areas

Double leaf emergency exit and panic doors (left hand door and right hand door)
Doors along escape and rescue routes
Fire and smoke protection doors

Product Data Table

Productname	IQ lock M DL
DIN direction	left / right
Temperature range	-10 °C 50 °C
Panic function / mechanical self-locking	Yes
Divided cross latch (3 mm gap between latch and bolt)	Yes
Mechanical timeout function	Yes
Resistant to forcing	10000 N
