## A4020-PA

Model with 2 mm longer, mechanical unlocking lever and wide recess in adjusting angle for KfV strike plates

### Product features

---

|   |
|---|
| Compact dimensions  |
| Almost noiseless opening behaviour with direct current even under high preload                                  |
| Recesses in the adjusting angle are optimised for the installation with KFV strike plates.                      |
| 2 mm longer unlocking lever that permanently unlocks the electric strike mechanically                           |
| Safe release of the latch even under high preload   |
| Adjustable radius latch by 3 mm, in 0.75 mm pitch   |
| Twin coil technology enables a larger operating voltage range   |
| Integrated bipolar EMC protective diode, which protects connected electronic components against reverse voltage |
| Can be installed on left hand and right hand doors as well as vertically or horizontally                        |

### Application Areas

---

|  |
|--|
| Standard doors   |
| Suitable for KFV (Karl Friedrich Vliether) strike plates |
| Connection to direct or alternating current              |

### Product Data Table

---

|                  |                                 |
|------------------|---------------------------------|
| Product features | Vector electric strike A4020--A |
| Height           | 68.7 mm                         |
| Overall depth    | 15.8 mm                         |
| Depth            | 25 mm                           |
