

Product data sheet

Rollan 40 NT wood

Sliding fitting system for timber, plastic, or metal doors with a leaf weight of 40 kg

Product features

Sliding door fitting for leaf weights of up to 40 kg
Particularly suitable for leaves made of wood, plastic, or metal
Standardised track for Rollan 40 and 80 enables simple adaptation to changing conditions of use
Smooth roller carriages, which can be set in motion with little effort
Simple setting of the interval between the door leaf and track
Concealable suspension plates allow for the door to be installed with a small clearance between the track and the upper edge of the door
Tested for durability in accordance with DIN EN 1527 over 50,000 test cycles
Closed aluminium track protects against ingress of dust and dirt
Simple, direct ceiling mounting or bracket mounting on ceiling and wall

Application Areas

For lightweight interior sliding doors
For passage doors or partition walls in living and office areas
Lower space requirements for the door fitting means simple installation even in tight areas
Single and multiple-leaf sliding doors
Installation to the ceiling or in front of the wall
