

# Product data sheet

# GEZE MCRdrive \*

Modular, hermetically sealing sliding door system with air permeability certification

## AREAS OF APPLICATION

- Single leaf sliding door systems
- Interior doors for areas with hermetic air permeability requirements
- Opening widths from 800 to 2500 mm possible
- Operating rooms, quarantine rooms and intensive care areas in health care
- Research institution laboratories
- Pharmaceutical and food industry

## PRODUCT FEATURES

- Consists of the GEZE MCRdrive drive unit and the GEZE MCRdrive leaf system
- Maximum customer-specific design thanks to modular construction: drive unit and/or leaf system including profile and sealing system
- Conforms to the noise protection requirement under EN 4109 of 37 dB and the air permeability class according to EN 1026 / EN 12207
- Sophisticated profile system for creating narrow contours and large glass surfaces
- Universal profile system for glass, HPL or stainless steel door leaves
- Full circumferential sealing system with sealing corners reduces the air permeability of the closed sliding door system
- Hermetic seal by lowering and pressing the door leaf against the frame structure
- Optimised opening widths for hospital operation (nurse opening, cleaning opening, bed opening)
- Low ordering and installation complexity thanks to a simple product concept
- Configuration possible via a configuration tool
- Simple and quick installation thanks to assembly tolerances, and the option of completing fine adjustments of the door leaf on site
- Can be networked, and integrated into the building automation via open standard (BACnet)
- Available glass and radiation protection with lead insert according to DIN 6834-1 can be implemented

## TECHNICAL DATA

Productname	GEZE MCRdrive *
For 1-leaf door systems	Yes
Leaf weight (max.) 1-leaf	140 kg
Opening width 1-leaf	800 mm - 2500 mm
Service temperature	-15 - 50 °C
IP rating	IP20
Standard conformity	EN 16005, DIN EN ISO 13849: Performance Level D, DIN EN 12207:2016

## PART

### GEZE MCRDRIVE DRIVE UNIT \*

Drive unit for sliding doors with hermetic air tightness requirements

### GEZE MCRDRIVE LEAF SYSTEM \*

Leaf and sealing system for areas with hermetic air tightness requirements
